Subject: Camera coverage for Seattle City Light property- "grease pits"

Todd,
Hope all is well with you and your ATF brothers.

At our meeting last week one our Officers in charge of Power Distribution mentioned that we have some alley ways that have SCL manholes that restaurant employees are pouring grease down severely damaging our equipment. If we provide a map of locations of the worst offenders, would your folks be able to install some temp cameras to capture the manhole areas. The intent is to record evidence and follow up with local law.

Right now there are 3 closely located geographic areas of a total of **5 manholes** being damaged.

Let me know if you think this is feasible with ATF and I will brief our folks.

Regards
Doug
